Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: claims 1-7, and 20-24 are directed towards a method for restricting printing based upon a user request having a characteristic, determination of whether this request in the set of one or more restricted requests, receiving an authorization indicator before printing data associated with the received user request having the characteristics, and suggesting an alternative unrestricted characteristic, if the user request is deemed to be restricted (Group I). Claims 9, and 11-16 are directed towards a similar but distinct invention, that calls for the user request to select a printing mode and having a numerical characteristic, basing the restriction upon the print mode, receiving an authorization indicator before printing the data using the print mode selected and suggesting an alternative print mode if the requested print mode is restricted (Group II). Claims 17-18 are directed towards using selective restriction on multi-colorant and single-colorant printing. The species are independent or distinct because Group I is based upon a print request characteristic, Group II is based upon both a print mode and characteristic with more emphasis on the print mode. Group III is directed towards choosing between multi and single colorant printing. While these groups might claim similar methods/systems/instruction in nature, they are still patentably distinct species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
